

Company Introduction

MCC is a consultant specialized for merchant ships and their crews.

ISM and ISPS are just 2 parts of a sphere of regulations, codes and resolutions we move into practice. Why not using these systems to your advantage? MCC offers support to ship owners, ship operators and other shipping related enterprises for all rules and regulations for merchant ships – wherever they may trade.

MCC's roots

MCC was founded in late 2006 by Capt. Andreas R. Schepers to provide expertise in maritime management to shipping companies (owners and operators). Born in 1968, he grew up on his father's coaster. Later graduated as Master Mariner and Engineer, served as Captain and developed maritime management systems well before the ISM Code came into force. Capt. Schepers then served several years in shipping companies as superintendent and DPA.

He successfully implemented the ISPS-Code in a 40-vessel-fleet trading into the US.

Scope of Service

In an increasingly safety minded environment MCC offers the maritime industry the necessary support to not only achieve what international conventions intend to aim in respect of maritime safety and environmental protection, but particularly to develop, implement and effectively maintain a company's own safety and environmental protection policy alternatively combined with a quality management system. MCC offers support and guidance to obtain final assessment and certification in accordance with the requirements of the

International Safety Management Code (ISM-Code) of the IMO or - if so chosen by the client - combined with a management system according to the ISO 9001/14001/45000 standards.

In addition, MCC offers assistance for ocean carriers and shipping companies to meet ISPS Code standards. This includes the draft of necessary assessments and the preparation of security plans for ships, including training / familiarization.

You name it - we know it.

MCC serves clients in Germany, the Netherlands, the Faroer Islands, the USA, Australia and Cyprus.

We assist shipping companies and their crews to comply with national and international regulations for merchant shipping enterprises. Specialized on US requirements.

Being pro-active is the way to better PSC results. We are present during world wide MOU PSC, as well as USCG inspections, and we know how to prepare your ship and your crew.

We provide anywhere:

- Live Navigation Assessments
- IHM Surveys
- Guidance and training on US requirements
- Internal ISM/ISPS/ISO audits
- Onboard crew training
- Risk assessments to prevent PSC downgrading

We develop, implement and maintain:

- Fully electronic ISM / ISO manuals
- Emergency Contingency Plans
- EU-MRV Plans, IMO DCS Plans
- Mooring System Management Plans (OCIMF/MEG4)
- STS Manuals
- Ship Security Plans (SSP)
- EPA / VGP registration and documentation
- Fully electronic MLC Manuals
- Bio-fouling Management Plans

Organization

- Ballast Water Management Plans
- Emergency Towing Booklets
- Garbage Management Plans
- SOPEP/SMPEP

Reduce to the max!

How we understand this is quite simple: you need to comply with certain national and international rules, so why don't we turn it around and make use of it. To the benefit of ships crew – just because they have to deal with it at the end of the day.

Goals

- Customer satisfaction.
- Keeping us permanently up-to-date.
- Research on new developments on worldwide shipping regulations.
- Risk based preventive action.
- Management systems to assist – not to hamper. And finally:
- Reduce to the MAX!
